

Aerosol Monitoring & Analysis, Inc.

Environmental, Health & Safety

Industrial Hygienist

Aerosol Monitoring & Analysis, Inc. (AMA) has openings for Industrial Hygienists. A four year college degree in a science or environmental field and experience in the following areas is preferred, but not required: hazardous materials surveys including asbestos and lead; contractor monitoring and oversight; water intrusion investigations; indoor air quality; mold assessments; industrial hygiene; exposure monitoring; and safety and OSHA compliance audits. Candidates with NIOSH 582 Equivalent training are favorable.

Responsibilities: Technical activities related to projects including field work, data and sample collections, sample preparation, analysis and laboratory submittals, document research, contractor oversight and office work including preparation of technical reports.

Most of our work is in the Washington/Baltimore region. We have an accredited in-house training division and will provide the right candidate the appropriate training and certifications required for projects.

About us: Aerosol Monitoring and Analysis, Inc. (AMA), was founded in 1981 in response to a growing need and market demand for high quality environmental hazardous material assessment and remedial design services by government and industry. AMA is a specialized industrial hygiene, health & safety consulting firm, providing Industrial Hygiene, Environmental and Health & Safety services to government agencies, institutions, building owners, property managers, architects and engineers.

We offer a competitive salary, excellent benefits, and a professional work environment. Send resume with current training and certifications to:
